

🔍 PHASE 1: PROCESS MAP 60 MIN

Map each process end-to-end (trigger → outcome). Mark every handoff, approval gate, and tool change. Identify: **handoff density** (how many times work changes hands), **tool switches** (how many tools touch one process), **approval bottlenecks** (where work waits for a person).

Process 1

NAME

e.g., Customer onboarding

TRIGGER → OUTCOME

e.g., Signup → First invoice paid

HANDOFFS

0

TOOLS

0

APPROVALS

0

Process 2

NAME

e.g., Support ticket

TRIGGER → OUTCOME

e.g., Ticket created → Ticket closed

HANDOFFS

0

TOOLS

0

APPROVALS

0

Process 3

NAME

e.g., Deploy pipeline

TRIGGER → OUTCOME

e.g., PR merged → Production live

HANDOFFS

0

TOOLS

0

APPROVALS

0

Process 4

NAME

e.g., Budget request

TRIGGER → OUTCOME

e.g., Request submitted → Approved/Declined

HANDOFFS

0

TOOLS

0

APPROVALS

0

📊 PHASE 2: METRIC BASELINE 60 MIN

For each process, measure **Lead Time** (trigger to outcome), **Active Time** (actual work), and **Wait Time** (queues). Efficiency = Active ÷ Total. Below 40%? Your team spends more time waiting than working.

PROCESS	LEAD TIME	ACTIVE TIME	WAIT TIME	EFFICIENCY	DATA SOURCE
Process 1	e.g., 5d	e.g., 8h	e.g., 4d 2h	e.g., 20%	Jira
Process 2					
Process 3					
Process 4					

Efficiency = Active Time ÷ (Active Time + Wait Time) × 100. If you can't get this data in 10 minutes, your process is invisible.

🎯 PHASE 3: PRIORITY MATRIX 60 MIN

Score each process on two axes: **Operational Impact** (how much does this affect revenue/delivery? 1-5) and **Fixability** (how much effort to improve? 1-5 where 1 = trivial, 5 = massive). Plot below.

P1 — Quick Wins

High Impact · Easy to Fix · Do this week

List processes that are both impactful and fixable...

P2 — Strategic Projects

High Impact · Hard to Fix · Plan next quarter

List processes that are impactful but need investment...

P3 — Nice to Haves

Low Impact · Easy to Fix · When you have time

List quick fixes that won't move the needle much...

P4 — Ignore

Low Impact · Hard to Fix · Leave alone

Processes that are not worth the effort right now...

⚡ TOP 3 ACTIONS THIS WEEK FOCUS

1. What's the single highest-impact fix?

2. What can you unblock this week?

3. What metric will tell you it's working?
